ABOUT ME

Passionate Computer Science student with a strong interest in cybersecurity and Linux systems. Enthusiastic about network security, system hardening, and building secure, scalable infrastructure, with a proactive mindset and a strong drive for continuous learning.

TECHNICAL SKILLS

Languages: JavaScript, Bash, Python, HTML/CSS, SQL, C/C++

Frameworks: React, Node.js, Express, Django

Tools: Nmap, Burp Suite, Metasploit, Linux/Ubuntu Server, Nginx, AWS, Minio, Tailscale, Docker, Git, Vercel

Certifications: Google Foundations of Cybersecurity, Scrimba JavaScript

EDUCATION

Sahyadri College of Engineering & Management

Mangalore, India

Bachelor of Engineering in Computer Science

EXPERIENCE

Event Lead — DevHost 2025

Jan. 2025 – Present

SOSC - Sahyadri Open Source Community

Mangalore, India

- Serving as a Lead for DevHost 2025, managing event logistics, technical workshops, and participant engagement for the annual flagship tech fest.

Core Team Member

Sep. 2025 – Present

GDG On Campus SCEM

Mangalore, India

- Lead strategic event planning and technical learning initiatives for the campus developer community.
- Gemini Student Ambassador of Sahyadri College Of Engineering And Management.

Core Team Member

Mar. 2024 – Present

SOSC - Sahyadri Open Source Community

Mangalore, India

- Contributed to open-source projects and mentored juniors in Git/GitHub workflows.
- Served as Volunteer & Mentor for HackHarbour 3.0, delivering workshops on Docker and Python.

PROJECTS

My Drive | *MinIO, Node.js, FileSystem API, HTML/CSS*

2024

- Built a personal cloud storage solution featuring secure file uploads, directory management, and downloads.

Agentic Self-Healing Cloud | *Kubernetes, Docker, FastAPI, Prometheus, Grafana*

2026

- Developed an autonomous Kubernetes operations platform for detecting failures, diagnosing root causes, and executing safe recovery workflows.
- Integrated observability tools to collect metrics, logs, and events for automated incident analysis and remediation.

Doom Game Recreation | *Unity, C#, Game Design, Game Physics*

2026

- Implemented foundational systems including first-person movement constraints, 2.5D pseudo-3D perspective mapping, basic raycast shooting logic, and player-enemy state tracking.

Home Server Infrastructure | *Ubuntu Server, Nginx, Tailscale, Reverse Proxy*

2024 – 2025

- Architected a personal lab environment using a Ubuntu Live Server to host web services and internal tools.
- Configured an Nginx Reverse Proxy for efficient traffic routing and SSL management.
- Integrated Tailscale mesh networking to provide secure, encrypted remote access to all home devices.

Braille Converter | *JavaScript, Accessibility Tools*

2024

- Created a utility to translate standard alphanumeric text into Braille patterns for accessibility use cases.

ACHIEVEMENTS & ACTIVITIES

University CTF 2024 — Binary Badlands (HackTheBox) | *Cybersecurity*

- Secured **410th rank out of 1200+** teams in an international competitive hacking tournament.

Hackathons

- Participated in **DevHost 2024 (Hacknight)**, Skill Sangam 2024 (TCE), and Srinaton 2.0.
